

Web Service For Receiving Submissions / Querying Status

Upload_Web_File

Input:

- 1) Username (IN) - String
- 2) Password (IN) - String
- 3) File Type (IN) - String (Use "REP" for Representative submissions)
- 4) File Name (IN) - String
- 5) File (IN) - BASE64 BLOB
- 6) GUID (IN / OUT) - String (Optional)
- 7) Result (IN/OUT) - String

Output:

- 1) GUID (IN / OUT) - String (Same as input, except if none was provided, then new GUID will be provided back to be used as reference)
- 2) Result (IN/OUT) - String

The XML format to be submitted for representative updates can be found at:

https://www.fsca.co.za/HTML/FAIS/Reps_Import_Format.xml

Get_Process_Response

Input:

- 8) Username (IN) - String (same username / password as used when submitting)
- 9) Password (IN) - String
- 10) GUID (IN) - String (using the GUID returned by previous web service)
- 11) Responded (IN / OUT) - Boolean
- 12) Date Responded (IN / OUT) - String (DD/MM/YYYY)
- 13) Time Responded (IN / OUT) - String (HH:MM:SS)
- 14) Response Report (IN / OUT) - BASE64 BLOB
- 15) Response Result (IN / OUT) - String
- 16) Result (IN/OUT) - String

Output:

- 3) Responded (IN / OUT) - Boolean (whether we sent the response successfully)
- 4) Date Responded (IN / OUT) - String (DD/MM/YYYY)
- 5) Time Responded (IN / OUT) - String (HH:MM:SS)
- 6) Response Report (IN / OUT) - BASE64 BLOB (this is the actual report)
- 7) Response Result (IN / OUT) - String (whether we responded successfully)
- 8) Result (IN/OUT) - String

The endpoint for obtaining the WSDL and testing / using the web services
